

# Solarcool® Reflective Glasses

## Woodland Towers III

Location: Salt Lake City, UT

Product: Solarcool (2) Solargray Glass

Architect: Smith Layton & Associates

Glazing Contractor: Linford Bros.

## Nature-Inspired Series

### Solarcool® Reflective Glasses

From golden bronze to slate gray, the PPG family of **Solarcool** reflective coated glasses has inspired architects and designers for more than 35 years with an expressive palette of nature-inspired colors. Now PPG adds sky-blue-tinted **Solarblue**® glass to the collection.

### Colors of the Earth and Sky

**Solarcool** reflective glasses offerings have been popular because of their rich, nature-inspired tones and solar-cooling performance. An extensive variety of appearances and performance attributes can be achieved by applying **Solarcool** reflective coatings to the interior or exterior surface of a bronze, gray, or **Solarblue** glass substrate.

### Solarcool® Solarbronze® Glass

**Solarcool Solarbronze** glass can be glazed with the reflective coating on the first (#1) or second (#2) surface.

The glass has improved performance, higher exterior visible reflectivity and a slight bronze hue when installed with the coating on the first surface. When the coating is applied on the second surface, **Solarcool Solarbronze** glass has lower exterior reflectivity and a deeper bronze color.

### Solarcool® Solargray® Glass

Two options abound with **Solarcool Solargray** glass. A striking silver aesthetic results when the reflective coating is applied to the outboard (#1) lite. A subtle dark-gray tint appears when the reflective coating is applied to the inboard (#2) surface.

### Solarcool® Solarblue® Glass

The light-sky blue tint of **Solarblue** glass takes on a richly saturated cast when the **Solarcool** coating is applied to the inboard (#2) surface. The glass achieves a sleek, silvery-blue tone when it is glazed on the outboard (#1) lite.

## Fabrication and Availability

**Solarcool** reflective glasses provide maximum processing flexibility and can be easily laminated, tempered or heat-strengthened to satisfy increased strength or safety glazing requirements. **Solarcool** glass is available from nearly 100 glass fabrication locations throughout the United States and Canada, and international representatives in 25 countries.

## Additional Resources

**Ecological Solutions from PPG™** encompass a number of environmentally sustainable architectural glass products. For more information or to obtain samples of any PPG glass product, call 1-888-PPG-IDEA (774-4332), or visit [www.ppgideascales.com](http://www.ppgideascales.com).

All PPG architectural glass is **Cradle to Cradle Certified™**

**PPG IdeaScapes®** Integrated products, people and services to inspire your design and color vision.

## One-Inch Insulating Glass Unit Comparisons Using 1/4" (6mm) **Solarcool®** Glass, Nature-Inspired Series

Insulating Vision Unit Performance Comparisons 1-inch (25mm) units with 1/2-inch (13mm) airspace and two 1/4-inch (6mm) lites; interior lite clear unless otherwise noted
